

Dremel® Pumpkin Carving Kit Fact Sheet

The Dremel® Pumpkin Carving Kit helps carvers take creative pumpkin carving to a new level:

- The kit's 6-Volt Dremel Alkaline Cordless rotary tool has two speeds, 7,000 and 14,000 rotations per minute, and is powered by four AA alkaline batteries (not included).
- The No. 191 High-Speed Cutter accessory has rounded edges and is ideal for carving fine details.
- The Dremel Pumpkin Carving Kit includes 10 artistic jack-o-lantern templates that range in levels of difficulty: two ghosts, a witch, a haunted house, a scary cat, two snaggletooth faces, a vampire, a skeleton and a "Happy Halloween" tagline.
- Dremel offers a two-year warranty on the Dremel Pumpkin Carving Kit.
- The kit's carving tool – the 6-Volt Dremel Alkaline Cordless – is not intended to cut through the pumpkin but rather should be used on the surface of a pumpkin after it has been cut and cleaned out. Any activity that involves the use of a sharp object, including the Dremel Pumpkin Carving Kit, requires adult supervision.
- The Dremel Pumpkin Carving Kit is available throughout the Halloween season online at www.dremel.com and at select hardware and home improvement centers nationwide for a suggested retail price of \$29.99.
