WONDER TABLITZ™ PRODUCTS EASY AS 1-2-3

Each Wonder Tablitz unit is sold with a spray bottle containing three effervescent cleaning tablets - each tablet representing one full 32-ounce bottle. Consumers simply follow the easy three step instructions.

- Step 1: Remove the side closure (screw-on cap) from the empty Wonder Tablitz spray bottle and fill the bottle with hot tap water to the 32-ounce fill indicator line.
- Step 2: Remove the blister pack containing the patented tablets from the cavity on the front of the spray bottle. Push one tablet through the blister pack into the water through the side closure and replace the cap. The tablet will begin effervescing immediately, creating an effective cleaner without residue. (It is 100 percent water-soluble.)
- Step 3: Begin cleaning. While the tablet will take one to three minutes to completely dissolve, depending on the water temperature, it begins releasing a powerful cleaning solution instantly upon contact with water. This enables the cleaning product to be used immediately.
