*Cost-Saving Tips***

- **Drive more sensibly.** Reducing speeds and minding the rules of the road uses less gas, keeping costs lower for your daily driving.
- **Plan ahead.** When running errands or going on trips, make many of your stops during one trip. Not only will this save fuel, it will save your time too.
- **Keep your car in shape.** It's important to perform routine maintenance on your car – make sure to maintain the proper tire pressure, change the air filters, get regular tune-ups and use the recommended grade of motor oil.
- **Choose an efficient vehicle.** Now, more than ever, car companies are launching more fuel efficient vehicles to help save on costs. When purchasing a new vehicle, research new options to help save in the future.
